DETAILED ACTION

Claim Objections

1. Claim 22 is objected to because of the following informalities: The term "said sealing element" in lines 1-2 has no proper antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 16, 17, 18, 20, 21, 22 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Strom (US 2,159,640).

The claimed structure reads exactly on the reference's when members (11), (6) and (any embedded surface portions of catching members 6 in direct contact with member 11) of Strom are respectively considered as "expandable mandrel", "slip" and "surface irregularity" as recited.

Allowable Subject Matter

4. Claim objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
